On June 28th, Aspire igen held the FUTURE project demonstration event: and career innovation and game storming workshop. The event involved representatives from regional universities, Department for Work and Pensions, local high schools career guidance practitioners, trainers and education experts.

The Future Time Traveller game is a European innovation, combining the career guidance towards the jobs of the future with game-based learning in 3D virtual world environment. Players participate with their avatars in the game, which teleports them in 2050 to discover how the world of work is going to change. The missions and challenges in the game help participants find out about the jobs of the future and develop many career skills in the same time.

The participants in the event also joined a career innovation workshop, in which they exchanged good practices and managed to generate ideas about new career games and tools. A lot of useful tips and inspiring good practices about game-based learning in career guidance have been shared during the workshop.

The presentations from the event are available here: <http://future-time-traveller.eu/bank-of-creative-ideas/>

Here is some feedback from the participants in the FUTURE demonstration event in Bradford:

"I think the game is great it provides a much needed tool that can galvanize young people to think of their future in such a relevant way. The project day was informative especially the sharing of best

practice in terms of game based learning, this project is exciting and will have great impact on communities who don't visualize their future.

Are you ready for next-generation career guidance?

FUTURE

JOIN THE EUROPEAN COMPETITION FOR INNOVATIVE GAME-BASED CAREER GUIDANCE TOOLS

<http://future-time-traveller.eu>

Co-funded by the Erasmus+ Programme of the European Union

Project N° 590221-EPP-1-2017-1-BG-EPPKA3-PI-FORWARD

To support innovation in career guidance, by 31.12.2019 the FUTURE partnership launches a European Competition for innovative career guidance tools and instruments. The competition aims to enhance, recognize and promote good practices of innovative tools, interactive games, scenarios, methods, platforms and other digital and non-digital game-based instruments for career guidance, information and counseling. It is open for career guidance professionals from all European countries. The application is only via email by 31 December 2019.

Project N° 590221-EPP-1-2017-1-BG-EPPKA3-PI-FORWARD

FUTURE is waiting for you!

To foster the active participation and empowerment of young people, the consortium of partners have created the Time Capsule “Jobs of the Future” contest across the 7 partner countries for young people aged 13-19. This contest encourages young people to explore their idea of what kind of future jobs, the challenges, skills and jobs that may appear. The participants can describe their ideas of future jobs in short text, 1 minute video or a short presentation. Winners will be awarded with solar charger, action camera and Bluetooth speakers. The deadline is December 31st and the young people can participate either through the game or submit their ideas directly through the application form here.
