

The European Competition for innovative career guidance tools and instruments took place in the period June – December 2019. It aimed to enhance, recognize and promote good practices of innovative tools, interactive games, scenarios, methods, platforms and other digital and non-digital game-based instruments for career guidance, information and counseling.

The contest was open for career guidance professionals from all European countries. We received [38 best practice entries from 13 countries](#). Professional jury has evaluated the received entries on their innovation, impact and multiplication potential.

All participants will receive a certificate, and their tools will be presented on the Future Time Traveler website and on the Facebook page.

Participants and teams who submitted the best practices in each country will be invited to demonstrate their instruments during the national final event in the end of 2020.

The awarded tools and games will be included in an E-book and will be promoted through the Euroguidance network across Europe.

The winner from each country and the winner from the international contest will be awarded a participation in a study visit, hosted by Aspire-Igen, which is the UK Euroguidance center.
